

Mini Pavilion

The brief was to create a piece that supports
4-6 people with a roof as well as a place where
people can study.

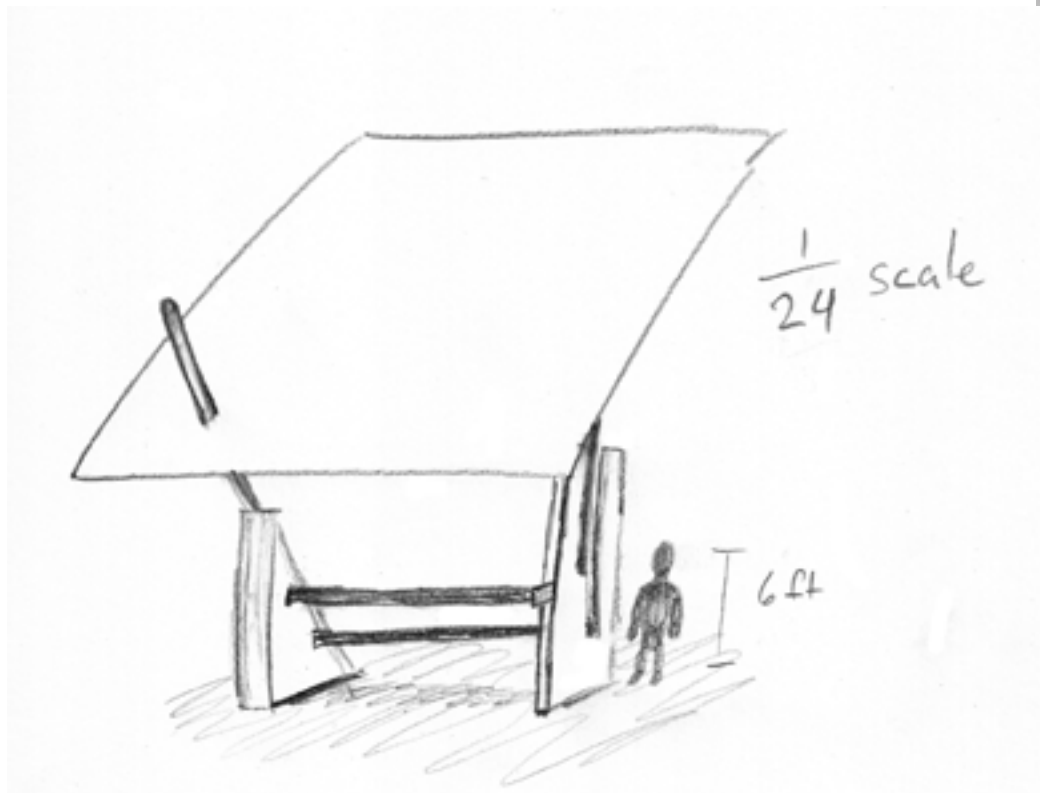

Area Research

Some ideas when the metaphor was a tree house. Later there was the use of intersecting forms to create the final forms.

Sketching Forms

Sketching Final Idea

To ensure the concept was sound, a foam board model was made. Foam modeling is a step in between sketching and creating more complicated models. Model making is part of the reason I pursued Industrial Design.

Foam Board Exploring
